Breathe Easier with our Homecare

RECEIVED

OCT 15 2007

ABS, Inc.

October 2007

TO WHOM IT MAY CONCERN:

My wife and I retained Advanced Building Systems to refurbish and re-do a 40,000SF building in Northampton that was built in 1925.

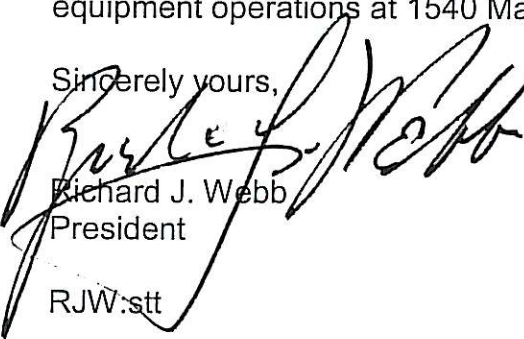

Originally an in-town car dealership and more recently the maintenance center for the Northampton School District, the building reflected a lifetime of hard use.

Some months later, we are now very pleased with both the interior and exterior finish and we've garnered many compliments from friends as well as the city fathers. Our experience with ABS over this time has been a positive one.

There was attention to detail and a timely response to the usual concerns that accompany any project of this size.

You are welcome to stop by to visit the home of our Lehigh Valley medical equipment operations at 1540 Main Street.

Sincerely yours,

  
Richard J. Webb  
President
