Administration and Finance

September 14, 2007

Mr. John Thorsen
Executive Vice President and COO
Advanced Building Systems
2300-B North 5th Street Hwy
Reading, PA 19605

Dear John:

With the completion of the Schumo Center for Fitness and Well-Being, I want to share with you the compliments that we have received regarding the quality of construction, the attractiveness of the building. This could only come about by the tremendous teamwork that existed between Advanced Building Systems and Albright College.

We were challenged to bring the project in on budget as established by the GMP and every indication exists that will be on target. The ABS staff that was assembled to work with the owner was professional, cooperative and collaborative. As a result of the relationship, we asked Advanced Building Systems to temporarily provide professional staff to assist the College in overseeing a number of capital projects, which were in various stages of planning and execution.

Advanced Building Systems demonstration of its willingness to address situations that do not conform to specifications or best practices is a tribute to the professional integrity that it has shown both on a previous project, the Shirk Stadium and the Schumo Center for Fitness and Well-Being.

Our congratulations on a job well done.

Sincerely,

Paul Gazzerro, Jr.
Vice President
Administration and Finance
