To Whom It May Concern:

I am writing this letter regarding ABS Construction. ABS recently completed a 13,000 square foot dormitory/office space building for the Caron Foundation. The project consisted of site work which was challenging since Caron is located on the side of a mountain, to complete building. The structure was built of masonry and frame construction. ABS completed the project ahead of schedule which is a first for Caron and on budget. As change orders arose, which they always do ABS was able to provide Caron the most economical way to move forward. The ABS team from John to the project manager to the field supervisor has been nothing short of professional and courteous through out the project. Caron will certainly use ABS on future projects and would highly recommend their services to any one looking for contractor services. If you would like to discuss further or have additional questions regarding the project and ABS, please do not hesitate to contact me.

Sincerely,

Troy Tranquillo
Corporate Director of Support Services
